

## Construcción Puerto Rico: the new directory of the construction industry of Puerto Rico

Relmagina Puerto Rico, the Puerto Rico Builders Association and the Associated General Contractors of Puerto Rico have joined forces to create a digital directory of resources in the construction industry of Puerto Rico. Our goal is to establish a portal where local companies and professionals can publicize their capabilities to carry out works related to the reconstruction of Puerto Rico. In this way, local companies and professionals working in the construction field in Puerto Rico are provided visibility in order to explore business opportunities, contracting, subcontracting and/or joint ventures. This digital directory portal incorporates companies and professionals classified under the following categories:

Design, Engineering  
and Planning

Commercial  
Contractor

Residential  
Contractor

Infrastructure  
Contractor

Suppliers

Services (PM, QA/  
QC, permitting, etc.)

To develop this directory of active resources, we are asking all those who work in the construction industry in Puerto Rico to complete the following form, which takes approximately 5 to 10 minutes to complete.

**The benefit of appearing in said directory is to be identified as an available resource to do business in the construction field in Puerto Rico by identifying capabilities, specialties and qualifications.**

Consequently, this tool will contribute to increase the hiring of local companies and resources in the reconstruction work of the Island. Please access the following link to complete the form, and, thus, appear in this important directory of active resources in the construction industry in Puerto Rico.

This directory is part of the initiatives aligned with the 97 recommendations of **ReImagina Puerto Rico, which promote a just and coordinated reconstruction that maximizes benefits for all Puerto Ricans**. In particular, it seeks to promote Action 3 and 4 of the Economic Development Sector Report: leverage reconstruction investments after Hurricane Maria in order to promote the recovery of the construction sector; and ensure that reconstruction-related procurements give priority to local workforce employment.

**We request that you complete this form by May 31, 2019. We expect to launch the digital directory in June of 2019. We will inform you of the date of launch of the portal in the near future.**

*The data in the portal is created by each user/company. ReImagina Puerto Rico and its affiliates are not responsible for errors or discrepancies in the data, and they do not endorse or guarantee the work of the company/professionals listed in the directory.*

If you have questions and/or comments regarding the form and/or this initiative, please contact one of the following organizations.
